

Distance estimation tool

Hold card at arm's length

- If the animal fits tightly in the box, it is approximately that far away
- If the animal is bigger than the box, it is closer
- If the animal is smaller than the box, it is further away

20m

40m

60m

Other common distances

- Average **walking step** length: 0.75m
- Standard **lane**: 3.50 m wide
- **Local streets**: 8 m wide
- Length of a **sedan**/ small SUV: 5m
- One standard-sized **bus**: 10 m long

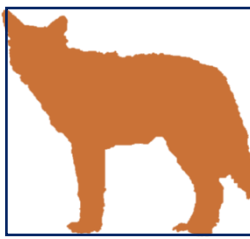

Thumb method – Another method to evaluate distances

- Hold your arm straight up, thumb up
- Close one eye, align thumb with distant object
- Switch eye (without moving your thumb)
- Estimate how far it moved sideways, and multiply that number by 10
